PRESERVED ACROSS DECADES

Time becomes part of the perfumer's palette.

Thirty vintage perfumery materials, preserved across decades. Rare oils and natural extracts meet distinctive fractions and preparations, each with its recorded maker and date.

Essential oils, absolutes, resinoids and separated fractions offer different expressions of the historical perfumer’s palette, from bright citrus and green notes to floral, roasted and smoky depth.

THE MAKERS BEHIND THE MATERIALS

Each entry preserves the maker’s name as recorded for the selected preparation, together with its recorded date.

OLFACTIVE FAMILY

Floral

12

Geranium Heart Fraction Intermediate Cut Thermal

Calchauvet
20 December 2004

Rosy freshness and minted leaf with green citrus and lightly peppery stems.

A green rose heart connected to lavender and dry woods.

28

Tuberose Absolute Pommade Exhaustion Extraction

Calchauvet
Before 2006

Buttery white petals and green creaminess with soft spice and warm floral depth.

An opulent white floral heart connected to orange blossom and soft woods.

OLFACTIVE FAMILY

Citrus

02 ## Bergamot Bottom Fraction Crude

Calchauvet
Before 2006

Bergamot peel and green citrus with a gentle fruit sweetness.

A citrus bridge into lavender and moss in a classic fougère.

16 ## Lemon Terpenes

Calchauvet
6 August 2004

Bright lemon peel and green rind with a dry citrus sparkle.

A crisp lemon lift for a citrus and aromatic opening.

30 ## Orange Bottom Fraction Terpeneless

Calchauvet
12 October 2005

Orange marmalade and bitter rind with waxy warmth and a richer citrus character.

A warm citrus connection into amber and tobacco.

OLFACTIVE FAMILY

Green

11

Galbanum Terpene Head Fraction Crude

Calchauvet
17 December 2005

Incisive green sap and pine with bitter earth and a wild resinous edge.

An assertive green opening for a violet leaf chypre.

OLFACTIVE FAMILY

Aromatic

10 **Fir 2 Molecular Distillation**

Calchauvet
Before 2006

Cool fir needles and green resin with a quiet dry wood foundation.

A forest accord balanced by cedar and a trace of moss.

13 **Juniper Buds Absolute Double Extraction**

Calchauvet
15 January 2004

An aromatic juniper direction with peppery wood and green coniferous facets.

A green aromatic accent around cedar and resin.

15 **Lavandin Absolute Grade Super**

Calchauvet
Before 2006

Aromatic lavender and hay with soft honeyed warmth and a lightly spicy edge.

A rounded aromatic heart in a lavender and cedar fougère.

22 **Pennyroyal Mint Morocco Concrete Grade Super**

Calchauvet
19 October 2001

Wild mint and cool camphor with dry herbs and a sun warmed hay shade.

A rugged herbal contour in a green aromatic forest accord.

26 **Thyme Grasse Absolute Grade Super**

Calchauvet
8 November 2004

Thyme leaves and phenolic heat with smoke and a dry herbal character.

A firm herbal backbone in aromatic woods and resin.

29 **Wild Chamomile Absolute Grade Super**

Calchauvet
14 May 2003

Dry aromatic flowers and apple skin with warm hay and a honeyed tea shade.

A dry floral herbal contrast beside honey and soft tobacco.

OLFACTIVE FAMILY

Spicy

07 ## Clove Leaf Essential Oil

Calchauvet
Before 2006

Warm clove and peppery leaf with dry green edges and a smoky wood impression.

A spicy floral contour in a carnation and incense study.

09 ## Elemi Resinoid Grade Super

SESOL
31 March 2006

Lemony brightness and pepper meet green balsam and warm resin.

A bright resin connection between citrus and incense.

19 ## Nutmeg Head Fraction Crude

Calchauvet
22 December 2004

Nutmeg and terpenic brightness with warm wood and a lightly powdered sweetness.

A dry spice transition between citrus and a woody amber base.

24 ## Black Pepper Oleoresin Pure PEPE 1016

Synthite Industrial Chemicals (P) Ltd.
4 October 2000

Dense pepper warmth and dry resin with earth and a dark woody character.

A savoury spice depth in tobacco and dark gourmand accords.

OLFACTIVE FAMILY

Woody

03

Cedarwood Morocco Terpenes

Calchauvet
8 November 2005

Pencil dry cedarwood and bright terpenic facets with a gently smoky amber shade.

A clear woody outline around conifers and aromatic herbs.

04

Cedrantone

Calchauvet
18 October 2001

Dry cedar like wood with amber warmth and a composed woody character.

A tailored woody frame beneath a rose or floral heart.

OLFACTIVE FAMILY

Mossy

17

Moss Bottom Fraction MD

Firmenich
16 October 2003

Dark earth and mineral depth with leather and a smoky woodland impression.

A textured foundation beneath dry woods and cured tobacco.

20

Oakmoss Adriatic Absolute Grade Green

Firmenich
3 July 2002

Dense green woodland and earth with a seaweed like shade and dry mossy depth.

A shaded chypre foundation beneath bergamot and rose.

OLFACTIVE FAMILY

Amber

06

Cistus Absolute 83 Double Extraction

CAL
21 October 1994

Ambery balsam and warm leather with sweet herbs and rounded resinous depth.

A rounded resin heart for a dry amber or incense composition.

OLFACTIVE FAMILY

Fruity

01

Apple Shavings Absolute

Calchauvet
Before 2006

Juicy apple and ripe fruit with rounded sweetness and a soft orchard impression.

A fresh orchard accord framed by green leaf and rose.

23

Prune Absolute Concentrated

PTS ABS
1 August 2001

Dark plum and dried fruit with wine like richness and a tobacco leather shadow.

A dried fruit bridge into tobacco and warm balsamic woods.

OLFACTIVE FAMILY

Gourmand

05 ## Chicory Absolute

Calchauvet
7 November 2002

Roasted bitterness and coffee like depth with dark caramel and an earthy edge.

A dry counterpoint to vanilla in a roasted gourmand accord.

14 ## Kola Nut Absolute

Calchauvet
24 April 2003

Roasted nut and cocoa like bitterness with dry tobacco warmth.

A nutty roasted layer in coffee and tobacco compositions.

08 ## Coffee Santos Extract Heat Treated Short Path Distillation

PTS ABS
11 August 2006

Fresh roast and dark cocoa with dry caramel and a warm coffee depth.

A coffee and tobacco gourmand with a restrained vanilla accent.

OLFACTIVE FAMILY

Tobacco

27

Tobacco Scrap Concrete Crude

Pierre Chauvet
15 January 1994

Cured tobacco and hay with honeyed dried fruit and smoke over leather.

A rich tobacco leather accord rounded by prune and cedar.

OLFACTIVE FAMILY

Leather

18

Nordic Birch Essence Grade Black Rectified

Calchauvet
Before 2006

Charred wood and tar like leather with a cool wintergreen glint.

A smoky accent in a leather accord with cedar and moss.

OLFACTIVE FAMILY

Powdery

21

Orris Resinoid Grade Extra

Calchauvet
Before 2006

Violet powder and creamy root with soft wood and a dry cocoa shade.

A textured iris heart connecting violet and soft woods.

OLFACTIVE FAMILY

Fatty

25

Tallow Fatty Acid Absolute

Calchauvet
7 August 2000

Fatty wax and creamy soap with skin like warmth and soft animalic texture.

A soft animalic texture beneath a powdery floral accord.

EXTRACTION & MATURATION

The craft behind the preserved material.

Time gives this collection its historical identity; extraction gives each material its form. Absolutes, concretes, resinoids and fractions reveal different parts of the source. The recorded preparation belongs beside its maker and year.

01 ## Absolute

An extract refined with ethanol from a concrete, pommade, resinoid or another suitable aromatic extract. The format often brings a fuller view of its aromatic source.

02 ## Concrete

A solvent extract that may retain waxes and other less volatile constituents alongside aromatic material. Its texture and scent depend on the source and preparation.

03 ## Resinoid

A solvent extract of dried natural plant material. Resinous gums and other aromatic feedstocks can yield substantial, textured materials for perfumery.

04 ## Oleoresin

An extract containing volatile aromatic components together with resinous and other non-volatile constituents. It gives a different perspective from an essential oil of the same source.

05 ## Heads, heart & bottoms

Names for portions separated during processing or distillation. They identify a cut of the material; the name alone does not establish its exact composition or odour.

06 ## MD & SPD

Molecular distillation and short path distillation are reduced-pressure separation techniques. Keep the method recorded for each material distinct; neither designation alone proves a particular degree of purity or scent strength.

07 ## Pommade extraction

An aromatic material recovered from a scented fatty preparation. The designation connects the extract with a different preparation stream from direct extraction of fresh flowers.

08 ## Essential oil

An aromatic product obtained from plant material by distillation or, for citrus peel, mechanical expression. Distillation and physical separation recover the oil. This preparation offers a different aromatic perspective from solvent-extracted absolutes and resinoids.

Scent descriptions and creative pairings are palette guidance drawn from the named sources and preparation types. Historical lots can differ; the individual sample is the final reference.

AN OLDER PALETTE / A NEW COMPOSITION

Five ways to compose with time.

Evaluate each sample individually and compare under the same conditions. These studies connect scent families without prescribing a finished formula.

01

From peel to forest floor

SAMPLES 16 + 30 + 03 + 20

Follow lemon and orange fractions into cedar and oakmoss. Study how a bright opening changes when its foundation becomes dry, woody and mossy.

02

Resin in daylight

SAMPLES 09 + 06 + 03

Consider elemi, Cistus and cedar as separate components of a resinous wood accord. Compare freshness, warmth and the space between them.

03

A darker gourmand

SAMPLES 08 + 05 + 23 + 27

Explore coffee and chicory beside prune and tobacco. Look for a balance between roasted character, fruit depth and dry leaf texture.

04

Herbs around a floral heart

SAMPLES 28 + 21 + 29 + 15

Set tuberose and orris against chamomile and lavandin. Compare floral volume, root-facing powder and aromatic softness.

05

Spice and shadow

SAMPLES 24 + 19 + 18 + 27

Compare pepper and nutmeg with birch and tobacco. Observe how dry spice can frame a smoky or leaf-like background without becoming the whole subject.
